WORK EXPERIENCE

Ikeda Limited, Noida

Tech Intern - summer 2025

June 2025 – August 2025

- Managed and maintained production AWS infrastructure supporting fintech services including AEPS, DMT, and ticket booking systems.
- Built 5+ CI/CD pipelines for automated deployment across production services.
- Implemented centralized logging across AWS EC2 servers using Filebeat, Elasticsearch, and Kibana (ELK) for improved monitoring and troubleshooting.

PROJECTS

RenewIQ – Intelligent Subscription & Billing Platform - Github | live

Built a full-stack SaaS platform using Java, Spring Boot, React, and PostgreSQL for subscription lifecycle management, automated billing, invoicing, and renewals. Implemented JWT authentication, role-based access control, REST APIs, scheduled billing workflows, and revenue analytics for MRR, ARR, churn, and retention. Containerized and deployed the application using Docker and AWS, with CI/CD through GitHub Actions and monitoring using CloudWatch.

Auto-Scalable Web Application on Kubernetes - Github

Containerized and deployed a web application on Kubernetes with Horizontal Pod Autoscaling (HPA) to automatically scale application instances based on CPU utilization. Configured Services, load balancing, health checks, and rolling deployments, and integrated Prometheus/Grafana for monitoring application and cluster metrics.

//Will Add an ai minor projects.
